Tim,

Thanks for doing this. Looks very good - may be somewhat ambitious - but better to try to be comprehensive. I think we need to discuss the high flow stations where we did have WWTP effluent impacts. We are trying to get papers into peer reviewed journals.

Let me know my assignments.

Roger

Roger and Bernie

When you get a chance, please have a quick look at the attached. I have thrown together some ideas and a rough outline of a possible paper on the high flow sampling work. Let me know what you think of the general idea and content. Once we agree on what to include, I am happy to put some time into fleshing it out. It sounds like it would be beneficial to the case to get some of this stuff published. And note that it doesn't matter to me what the order of authors is - whatever ever best helps the litigation effort.

Cheers
Tim
